PHIL Inter Pharma USA specializes in soft gel contract manufacturing and distribution, founded in Southern California in 2011 by PHIL International, a soft gel research and development company based in Korea. Under the same enterprise, PHIL Inter Pharma has been in commercial production of pharmaceutical and dietary supplement soft gels at the WHO-GMP accredited facilities since 2005.

PHIL Inter Pharma USA enters into the US dietary supplements market with full support of PHIL International and PHIL Inter Pharma. PHIL International has been researching and developing soft gel formulations for the past 15 years while PHIL Inter Pharma has been applying them in commercial production of various pharmaceutical and dietary supplement soft gels. This collaboration has been widely successful in the industry and we expect the same result in USA.
